

WINDOWS AND DOORS COMPANY

UK MARKET RANGE OF PRODUCTS

WITRAZ

ABOUT COMPANY

WITRAŻ Company has been working in the international and domestic market since 1999, gradually transforming into one of the biggest window manufacturers in Poland, Podlaskie voivodship. We are a leader in manufacturing Timber, PVC and Aluminium products.

Care for high aesthetics of our products and efforts for highest quality let us gained the trust of our customers and expand our business into other European countries. "WITRAŻ" Company is one of the few Polish manufacturers who was rewarded a prestigious **Q-ZERT** quality certificate which is issued by European Institute of Building Technology in Rosenheim.

This centre is one of the most valued and respected research institute in the world. It verifies compliance of produced goods with valid quality norms. **Q-ZERT** certificate awarded to the company confirms that production process and

quality control as well as each product which leaves the machine park is consistent with the European quality norm **PN-EN 14351-1** and the company meets a number of rigorous requirements confirmed by an accredited employee of the Institute.

WITRAŻ company is still developing. It can be noticed in our financial balance, where the annual sales increase accounts for 10-20% every year. At the moment, we are exporting our windows within the whole Europe: Belgium, Netherlands, Greece, Germany, Italy, Lithuania, Latvia, Czech Republic, Slovakia, France, The United Kingdom, Ireland, Portugal, Israel and Norway.

At the moment, we are making 2.500 m² wood windows per month. Our production is able to produce up to 4.500 m² windows per month. Also we are making more than 800 PVC windows per day. For that reason, we are looking for good and reliable partner.

SASH WINDOWS

Windows are very elegant, their classic profile allows it fit in historical look of the building.

Window perfectly harmonize with the modern as well as old constructions.

We offer 3 types of window width: 140 mm frame for listed buildings or buildings where

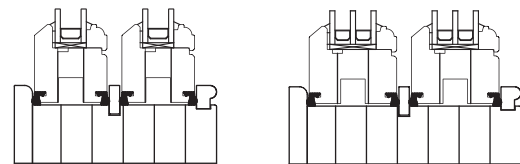

You can't use wider frame, 156 mm – our standard product and 180 mm window for triple glazed units.

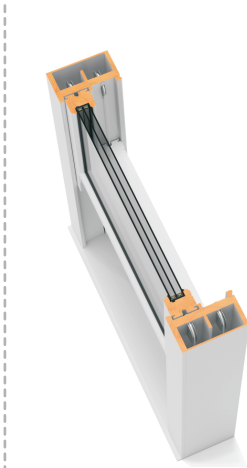

SPRINGS

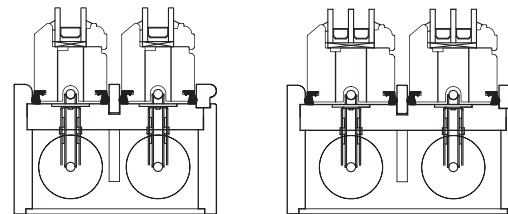

- ✓ Modern sash window is based on spiral balances that allows thinner frame of the window
- ✓ spiral balances are made up according to the size and weight of a particular sash
- ✓ Fitch fasteners, Alliance Sash fasteners, Claw Sash fastener

CORDS AND WEIGHTS

- ✓ Traditional sash windows operate via a mechanism that consists of cords and pulleys counterbalanced with weights
- ✓ Weights that we use are manufactured in Great Britain
- ✓ Double or Triple glazed units

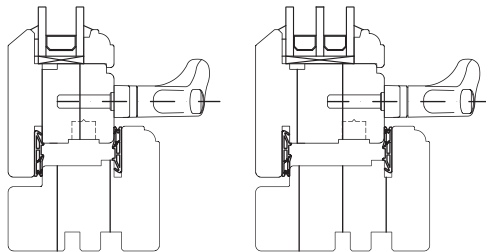

CASEMENT STORMPROOF + FLUSH

Classic construction that by outward opening saves a lot of space in the room.
A very tight window – a wind pressure force ensures window clamp between the sash and window frame. Casement windows done in two systems: Stormproof and Flush.

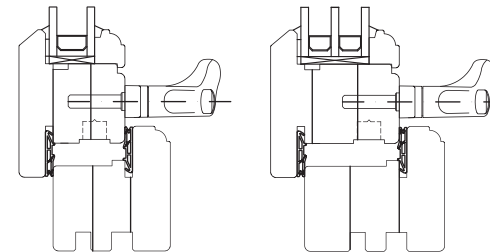

CASEMENT FLUSH

- ✓ Windows are made from the best laminated wood - pine, mernati and oak
- ✓ Classic British design
- ✓ Available in two versions: 56mm frame for double glazing and 68mm frame for triple glazing
- ✓ Wide range of hinges that can be used

CASEMENT STORMPROOF

- ✓ Simple and modern design
- ✓ Great wind insulation
- ✓ Available in two versions: 56mm frame for double glazing and 68mm frame for triple glazing
- ✓ Windows are made from the best laminated wood - pine, mernati and oak

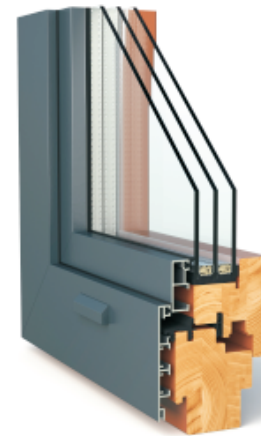

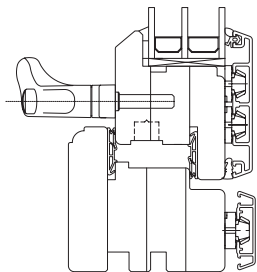

ALUMINIUM CLADDED WINDOWS

Choose most prestigious timber windows with aluminium cladding if You're looking for highest quality of wood and durability of aluminium.
This line of products were created for most demanding customers and are almost maintenance-free.

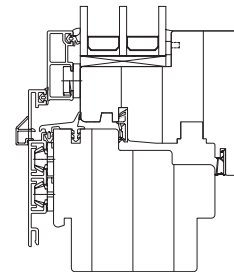

CASEMENT ALU

- ✓ Aluminium cladding on the external side of the window
- ✓ This long-term trouble-free use of woodwork without the necessity of maintenance
- ✓ Window type suitable for flats, apartments, houses as well as commercial buildings
- ✓ 2 variants of the thickness of wood
80, 92 mm glazed units from 24 to 40 mm

DUO CONTOUR

- ✓ The combination of excellent Ecoline, Thermoline Ecotherm systems and durability of aluminum full range of colors
- ✓ 3 variants of the thickness of wood
68,78,92 mm; glazed units from 24 to 60 mm
- ✓ 4 different types of aluminium cladding

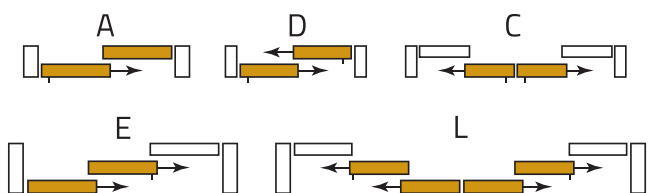

LIFT AND SLIDE

Lift and slide system provides a secure, lightweight and comfortable movement of single sash up to 400kg. A choice of three thicknesses profiles 68,78 and 92 mm. Many schemes of opening even up to 6 leaves. Trusted sealing system supports the sound insulation.

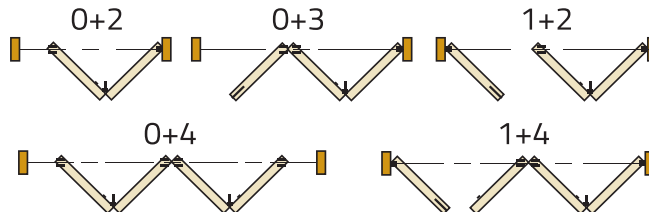

- ✓ Top class GU fitting, with innovative, modular ThermoStep threshold
- ✓ A comfortable GU handle system, the possibility of unilateral handles, bilateral, and their connection to the different types of inserts.
- ✓ Optional automatic system of opening doors
- ✓ Optional anti-bug net hidden in frame

BI-FOLD DOORS

Great space saving windows, widely used for patios and balconys. Manufactured both from wood and PVC. Breathtaking effect of open room. Folding windows are perfect for projects needing a pass-through type serving system, such as hotels, clubs and restaurants.

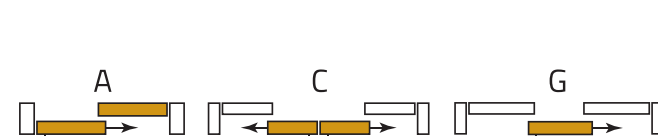

- ✓ Double or triple glazed units
- ✓ Wide variety of configurations
- ✓ Practical panel and color options provide maximum flexibility
- ✓ Indistinguishable from real wood and handcrafted for exceptional beauty

TILT&SLIDE DOORS

Tilt-and-slide system allows you to easily move the sash weights up to 200 kg and safely be tilted. This makes it possible optimal ventilation. Three thick profiles and many color options to choose from in a clever Tilt and Slide system with optimal ventilation.

- ✓ Special fittings allow you to open the door to a small area, four-sealing and locking contribute to the high comfort and safety.
- ✓ Double sealed wing (main seal and rebate one) protects against noise and heat loss. Rely main seal on the window frame, and not a drip is an advantage - it prevents the ingress of water into the connection of the frame.
- ✓ A comfortable Maco handle
- ✓ installation depth 68,72 or 92 mm
